Case Study

[Technology Solves Challenges: Ultra Dairy meets specific requirements with marking and coding solutions](#)

Ultra Dairy is a 40,000-square-foot ultra pasteurization manufacturing facility that specializes in extended shelf life (ESL) products. The dairy processes a variety of products with varying shelf lives for different brands, so it relies on

variable data marking and coding equipment to print expiration dates, lot codes and other company-specific information on its products' primary packaging and cases.

Industry News

[European Regulation Mandates Braille on Pharmaceutical Packaging](#)

A European Commission Directive now requires that all pharmaceuticals intended for human use have important information printed in Braille on the secondary packaging. While Braille on packaging is not yet a requirement in the United States, it is a good idea for U.S.-based companies to be well-informed on the best practices of Braille printing in preparation for the possibility of a similar regulation being passed in the United States sometime in the future.
