Case Study

[Clear Codes Help Bell Laboratories Control Rodent Populations Worldwide](#)

Bell Laboratories, Inc., manufactures a variety of rodent control products that must be labeled with a lot code and other tracking information before they leave Bell's facility. To meet a demanding schedule and ensure every package is properly coded, Bell relies on its ink jet printer for maximum uptime and code clarity.

Industry News

[Easy-to-Use Printers Reduce Learning Curve, Downtime](#)

Unplanned downtime can occur many ways, some of which could have been prevented by providing better instruction to a less-experienced employee. To combat

this challenge, suppliers are building conveniences into marking and coding equipment to help employees avoid common mistakes.
