

Continuous Inkjet

1650 Ultra High Speed

Higher throughput targets, increasing regulatory and supply chain needs, and greater focus on operational efficiency all equate to increased demands on your production lines.

Superior speed in itself is worthless without high quality, accurate coding and high uptime. The Videojet 1650 UHS delivers against the demands on your production lines through a unique combination of design and advanced ink formulations. Combining the ultimate in print speed, the most innovative printhead technology, and the advanced CLARiTY™ interface, the Videojet 1650 UHS allows you to deliver more product with more code content – all while making sure the right code gets printed on the right product.

High quality coding at high speeds

- Videojet's Precision Ink Drop™ system provides precise character formation, even at the highest speeds and longer throw distances
- Dynamic Calibration™ adjusts jetting parameters automatically to ensure high quality print
- Superior technology enables you to add content without compromising speed
 - Single line max speed = 1666 ft/min (508m/min)
 - Dual line max speed = 694 ft/min (212m/min)
 - Tri-line max speed = 588 ft/min (179m/min).

Engineered for extended runs

The Videojet 1650 UHS gives you an uptime advantage via:

- CleanFlow™ technology resists ink buildup that can cause ordinary inkjet printers to shut down
- Long run time between preventive maintenance, up to 14,000 hour core life
- Internal pump means no external air, minimizing potential for contaminants to enter ink stream
- Auto cleaning printhead for fast start-ups even after extended shutdowns.

Simple usability via an advanced user interface

- Productivity tools give you standard OEE metrics backed by actionable data
- Fool proof data entry helps you get the right code, in the right place, at the right time, virtually eliminating errors
- Large, responsive 10.4" touchscreen with intuitive navigation simplifies operation and makes key data easily visible.
