What is a medical device?

Medical devices range from devices as simple as a thermometer to more sophisticated devices, such as artificial hearts, lung ventilators, and heart and kidney transplants.

What is a UDI code?

UDI is a unique device identification system created and regulated by the U.S. Food and Drug Administration (FDA). It is designed to enable the traceability of medical devices throughout their distribution and use.

Keep an eye on the UIDI timeline for the regulation.

Select the right printing and marking equipment for applying the right codes.
