Continuous Ink Jet

Videojet® 1630

Engineered for superior uptime in high speed applications. The Videojet 1630 offers greater productivity and low cost of ownership.

Demanding manufacturing facilities require predictable maintenance to maximise uptime and increase profitability. The Videojet 1630 features Long Life Core™ technology that provides five years of operation between planned wear parts replacement, delivering lower cost of ownership for high-speed and around-the-clock applications. Innovative features including patented CleanFlow™ and Dynamic Calibration technology provide increased productivity and superior print quality even at high speeds.

Uptime Advantage

• Long Life Core™ guarantees 5 years continuous operation from point of installation(1)
• CleanFlow™ technology resists ink buildup that can cause ordinary ink jet printers to shut down
• Internal pump means no external air, minimising potential for contaminants to enter ink stream
• Auto cleaning printhead for fast start-ups, even after extended shutdowns

Built-in productivity

• Dynamic Calibration™ adjusts jetting parameters automatically to help ensure high quality print
• Print 1 to 5 lines of print for a range of coding needs
• Smart Cartridge™ fluid delivery system to virtually eliminate spills and help ensure the correct fluids are being used

Code Assurance

• Multiple password protected access levels to system control menus help avoid unintentional input errors
• Storable print messages with pre-set and calculated fields minimise required user input
• Easy Videojet CLARiSOFT® and CLARiSUITE™ integration allows for remote control of advanced code functionality

Simple usability

• Bright display with WYSIWYG and function keys for easy operation
• Store up to 250 complex messages for easy recall – store even more messages using a standard USB memory stick
